GUIDE TO GRILLE INSTALLATIONS

LOWER SPORT GRILLE KIT (SUB-1737) TO FIT SUBARU 2013-16 BRZ

Picture #1:
Our project Subaru BRZ in need of a Grille.

Picture #2:
Under the Hood, holding the Bumper is a black retaining bar, you must remove it by popping out the clips with a Flat Screw Driver.

Picture #3:
Then Remove the 10mm bolts holding the retaining bar to the core support.

Picture #4:
The retaining bar should come right off with all screws and clips removed.

Picture #5:
Remove the two bolts holding the bumper to the core support as well as the clips underneath the bumper.

Picture #6:
You'll need to remove the (3) clips holding the fender-liner to the bumper with a flat screw driver.

Picture #7:
Pop out the side markers by pushing the clip inward, releasing the light. Then, remove the small black clip holding the bumper to the fender right behind the light.

Picture #8:
Twist the bulb socket out of the light and pull the side marker out of the bumper. It should come free easily.

Picture #9:
Now you can unclip the bumper from the vehicle by gently pulling away from the vehicle.

Picture #10:

Disconnect the lower bumper lights from the vehicle. The bumper should fully detach from the vehicle now.

Picture #11:

With all clips and screws remove, the bumper should come right off.

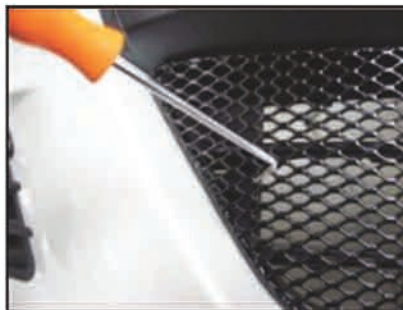

Picture #12:

With the bumper removed, place it on a sturdy support making sure it won't scratch or become damaged.

Picture #13:

For the following steps, you'll need a scribe or any sharp marking tool like the one pictured.

Picture #14:

Place the grille insert into the bumper opening, making sure it's flush all the way around the opening. Now with your scribe tool, mark the center holes on the mounting tabs all the way around.

Picture #15:

Using a 3/16" drill bit, drill the four (4) mounting holes for the insert.

Picture #16:

Mount the included U-Nuts onto the outer sides of the grille.

Picture #17:

With the mesh insert placed into the bumper, use the included screws to mount the insert with the supplied flat-nuts.

Picture #18:

The flat-nuts should mount as pictured. Tighten the two together being sure not to strip the threads.
